INDEXES

Subject Index to Volume 5

A

Acinar cells, exocrine, workings of (News), 41
Acoustic signals, skeletal muscle, 17
Adenosine, retaliatory metabolite, 67
Adenosine triphosphate, potassium channels regulated by, diabetes mellitus, 143
Adrenergic control, mucus secretion, airway, 2
Aging, process of (Notes), 224
Airway, mucus secretion, 2
Alcohol
  cutaneous blood flow and (Notes), 225
  effects on the heart (Notes), 271
Aldosterone
  mechanism of action (News), 141
  secretion, osmolality and, 197
Altitude, high, exercise in (bird), 191
Alveoli, recent studies, 50
Aminophospholipid translocase, physiological significance, 53
Ammonia, excretion, carbon dioxide help (Notes), 80
Amnion, human, control of prostaglandin production in, 259
Angiogenesis, endothelial cells, 75
Anoxia, resistance to, brain (turtle) (Notes), 139
Arousal, standing (Notes), 138
Arrhythmias
  susceptibility to, behavioral influences on, 108
  ventricular, late potentials and, 173
Atrial natriuretic peptide, sodium channel transformation (Notes), 182
Autonomic nervous system, brachial artery diameter and, hypertension, 125
Axonal branches, blind endings, plasticity and, mammalian CNS, 215

B

Behavior, coronary blood flow, susceptibility to arrhythmias and, 108
Bicarbonate, reabsorption, renal, 13
Biomedicine, precepts for investigators (Perspectives), 133
Blood flow
  coronary, behavioral influences on, 108
  cutaneous, alcohol and (Notes), 225
  neurotransmitter secretion and, ATP-sensitive potassium channels in control of (News), 226
Blood pressure: *see also* Pressure
  control, medullipin system of, 241
  noninvasive ambulatory monitoring, 176
Brachial artery, diameter, autonomic nervous system and, hypertension, 125
Brain, damage, calcium and excitotoxins in, 120
Breathing
  analysis, 233
  potassium and, 104

C

Calcitonin gene-related peptide
  inotropic and chronotropic effects (Notes), 81
  mechanism of vasorelaxation (Notes), 272
Calcium, excitotoxins, brain damage and, 120
Capacitance, vascular, cardiovascular control and, 250
Capillaries, new, tightly regulated extracellular proteolysis (News), 272
Carbon dioxide, ammonia excretion and (Notes), 80
Cardiac cells, membrane currents, 28
Cardiovascular function
  sympathoadrenal interactions in control of, 237
  vascular capacitance in, 250
Cardiovascular regulation, subretrofacial nucleus in, 63
Cell volume, regulation, ion channels and, 112
Cerebral cortex, color center in (Notes), 39
CGRP: *see* Calcitonin gene-related peptide
Chloride channels, calcium-activated, renin secretion and, 43
Cholecystokinin
  nutrient assimilation and, 163
  why do we stop eating? (Notes), 80
Cholinergic control, mucus secretion, airway, 2
Chromosome 1, dominant gene(s) on, life span control and (News), 83
Chronotropic response, intrinsic (Notes), 82
Conflicts, view in science (Perspectives), 268

D

Diabetes mellitus, ATP-regulated potassium channels and, 143
Digitalis-like compounds, endogenous, chemistry of, 204

E

Editorial, 1
EDRF: *see* Endothelium-derived relaxing factor
Education, teaching physiology in developing countries (Perspectives), 269
Endocardium, role as a transducer (News), 226
Endothelial cells, morphogenetic and invasive properties, angiogenesis, 75
Endothelium-derived hyperpolarizing factor, potassium channel activation, 212
Endothelium-derived relaxing factor, control of circulation (Notes), 271
Endotherms, metabolic rate, 25
Environment, earliest influence (Notes), 81
Erythrocytes
  size, kidney function and (Notes), 40
  stiffened, flow resistance and (Notes), 138
Exercise
  high-altitude (bird), 191
  hormone release and (Notes), 39
Eye, adaptability (fish) (Notes), 183

F

Feces, hard and soft (Notes), 183
Feeding, behavior, glucoreceptor systems and, 46

G

Ganglionic blocking agents, mechanisms of action, 168
Genetics, mammalian, mice made to order (News), 141
Glucoreceptor systems, glycemia control, feeding behavior and, 46
Glucose, transporters (News), 273
Glycemia, control, glucoreceptor systems and, 46

H

Heart
  autonomic outflow, beat-to-beat variations of heart rate, 32
  efficient design (Notes), 81
  function, continuum mechanics approach to analysis of (News), 184
  relaxation, autonomic effects on (Notes), 139
Heart atria, tachycardia, 187
Heart-lung transplantation, physiology of, humans, 71
Heart rate, beat-to-beat variations, cardiac autonomic outflow and, 32
Heat, sensitivity, facial veins (Notes), 183
Hormones
  early signaling events in, 21
  release, exercise and (Notes), 39
Hypertension
  autonomic nervous system, brachial artery diameter and, 125
  obesity effects, 245
  salt and (Perspectives), 220

I

Immune system, regulation, pineal gland and, 11
Insulin, secretion, pancreatic β-cells, 254
Ion channels
  cell volume regulation, 112
  patch-clamp recording, 155
Ionic currents, myocardium, 28

K

Kidney
  bicarbonate reabsorption, paradox of, 13
  function, erythrocyte size and (Notes), 40
  physiology, stop-flow technique (Perspectives), 180
Kidney tubules, proximal, apical membranes, single-channel techniques applied to, 194

L

Life span, control, dominant gene(s) on chromosome 1, 83
Lipids
  metabolism, pineal gland and, 11
  transmembrane pump, physiological significance, 53
Lung
  adult mammalian, neuroepithelial body function in, 89
  dry, newborn (Notes), 80
  venous congestion, reflex effects, 95
Lymph, transport, peripheral lymphatics, 85
Lymphatics, peripheral, lymph transport mechanisms in, 85

M

Magnesium, oocyte response to gonadotropin and (News), 41
Magnetic field, sensing of, mammals (Notes), 271
Medullipin, blood pressure control, 241
Mitogenic response, early signaling events in, 21
Models, painful peripheral neuropathies, 128
Motor units, activation, coordinated arm movements, 159
Mucus, secretion, airway, 2
Muscle
  fast and slow, mechanisms (Notes), 184
  sphincteric striated, properties of, 263
Muscle, skeletal
  acoustic signals from, 17
  arm movements, activation of motor units in, 159
  sodium-potassium pump in, 148
Myocardium, ionic currents in, 28

N

Nausea, pregnancy, 5
Neuroepithelial bodies, function, adult mammalian lungs, 89
Neurons, processing of contours, 152
Neuropathy, peripheral, experimental models of, 128
Neurotransmitters, secretion, ATP-sensitive potassium channels in control of (News), 226
Newborn, dry lungs (Notes), 80
S-Nitrocysteine, EDRF and (Notes), 271

O

Obesity, hypertension and, 245
Osmolality, aldosterone secretion and, 197
Oxidase, oxygen sensing and (News), 185
Oxygen
  diffusion, arterioles to capillaries (Notes), 224
  pressure, monitoring by carotid chemoreceptor, 229
  sensing, oxidase and (News), 185
  uptake, elite athletes (Notes), 40

P

Pancreatic β-cells, insulin secretion in, 254
Peptides
  blood plasma proteins, 201
  regulatory, early signaling events in, 21
Pineal gland, research of, 11
Plasticity, blind axonal endings and, mammalian CNS, 215
Polypeptide growth factors, early signaling events in, 21
Posture, size-dependent (Notes), 39
Potassium, breathing and, 104
Potassium channels
  ATP-regulated, diabetes mellitus, 143
  ATP-sensitive, blood flow and neurotransmitter secretion (News), 226
Potentials, late, ventricular arrhythmias, 173
Pregnancy, sickness, 5
Prostaglandins, production, control in human amnion, 259
Proteins, blood plasma, peptides derived from, 201
Proteolysis, extracellular, capillaries and (News), 272
Pump, sodium-potassium, skeletal muscle, 148

R

Receptors, chemoreceptor, carotid, monitoring of oxygen pressure, 229
Renin, secretion, calcium-activated chloride channel control of, 43

S

Saccades, visual guidance of, 58
Salt, hypertension and (Perspectives), 220
Sensory signals, translation of, 58
Sex differences, discrimination (bird) (Notes), 272
Sleep, thermoregulation during, mammals, 208
Sodium-potassium-ATPase, alveoli, 50
Spinal lesion, axonal growth past (News), 83
Stop-flow technique, renal physiology (Perspectives), 180
Subretrofacial nucleus, cardiovascular regulation and, 63
Sulfur vapor, origin of life (Notes), 81
Sympathetic nerves, peripheral, cervical region, 100
Sympathoadrenal interactions, control of cardiovascular function, 237

T

Tachycardia, atrial, 187
Thermoregulation, during sleep, mammals, 208

V

Vagal afferents, reflex effects, pulmonary venous congestion, 95
Vasorelaxation, CGRP mechanism in (Notes), 272
Vomiting, pregnancy, 5

W

Water, deprivation, osmolality and aldosterone secretion in, 197

Give a Gift of *NIPS*
Special Reduced Rate of $25

Help a scientist in a developing country by giving him or her a gift of *News in Physiological Sciences*, the only international journal designed to keep physiologists up to date about developments in physiology worldwide.

For individual gift subscriptions, send the recipient's name and address, your name and address, and $25 (US) (check, MasterCard, VISA, and American Express accepted) to Publications Manager, IUPS/APS, 9650 Rockville Pike, Bethesda, MD 20814. The recipient will be notified of your generous gift.
